IN ORDER TO HELP YOU CHOOSE YOUR PADDLE AND FINDING THE CONFIGURATION WHICH IS APPROPRIATE TO YOU, YOU'LL FIND BELOW THE ANSWERS TO THE QUESTIONS THAT YOU ASK.

## FIRST Racing

### 1) What is the type of program of the "Rush First Racing" ?

The "Rush First Racing" is a versatile competition paddle for beginners, which means that it was designed to deliver its highest efficiency for a dynamic stroke. You can use in the following programs : flatwater Racing, marathon, ocean racing, sea kayak, surfski, fitness.

### 2) Can I use the "Rush First Racing" in a white waters river ?

No, competition paddles are products designed in highly technical materials such as carbon and fiberglass. We do not recommend the use of the "Rush First Racing" in such practices.

### 3) Are there several blade sizes available for the "Rush First Racing" ?

The "Rush First Racing" is available in three sizes :

- **Small** for very short builds.
- **Medium** for short builds.
- **Large** for standard builds.

### 4) What materials are the blades of the "Rush First Racing" made of ?

The blades of the "Rush First Racing" are made in Fiberglass + Carbon "prepreg".

### 5) What is the standard feather of the "Rush First Racing" ?

We recommend, for the "Rush First Racing", a right or left angle between 55° and 60°, according to your preferences. This feather is "Standard" for competition paddles. *However, you can order your paddle with a custom feather, with no extra charge. (The feather is the degree angle of the paddle blades are off-set to each other).*

### 6) Is the "Rush First Racing" delivered with a paddle grip and drip rings ?

Yes and no ! The standard "Rush First Racing" does not come with a paddle grip and drip rings. But you can order them as accessories. *We do not recommend to add paddle grips to the competition paddles, as they will interfere with the stroke.*

### 7) What are the shaft available for the "Rush First Racing" ?

The "Rush First Racing" is only available with the carbon soft shaft .

### 8) What are the advantages of the different adjusting systems available on the "Rush First Racing" ?

You can choose among several options for your "Rush First Racing":

- **Fixed or Mono** : This option means that you have no displaceable adjusting system on your "Rush First Racing".

The length and the feather are fixed.

- **Vario S-Lock System** : The Vario S-Lock can be adjusted over 10 cm with an infinite choice of feather. It also enables you to adjust your paddle with more precision. *This option is recommended for all the paddle-users who want to customize their "Rush First Racing" as much as possible.*

### 9) What length should I choose for my "Rush First Racing" ?

Straight ajustable	190>200		195>205		200>210		205>215		210>220
Fixed	200		202		205		208		210   212   215

### 10) How heavy will my "Rush First Racing" be ?

The weight of your "Rush First Racing" depends on the types of handle and system you choose ! Here is an example of weight : - RUSH FIRST Racing - Large / 210 > 220 cm : 880 gr. / 31,05 oz
